

# MANAGING YOUR SUPPLY CHAIN DATA

SOLUTIONS TO AUTOMATE, INTEGRATE AND IMPROVE

ARE YOU FACING SUPPLY CHAIN DATA CHALLENGES LIKE THESE?  
WE ARE HERE TO HELP.

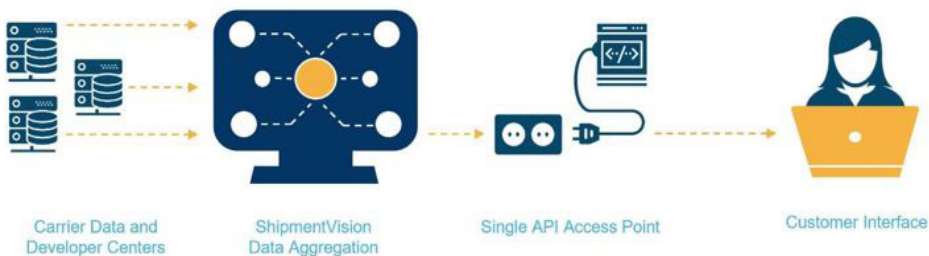

## APIs OFFER A NEW DATA EXPERIENCE

Otherwise known as “Application Programming Interface,” an API is a software intermediary that allows information to be shared between various technology platforms.

Loup’s advanced technology platform, ShipmentVision, offers easy API connectivity to aggregated rail data across all rail carriers in a network with access to rail car locations, ETAs, shipment status, waybill details and more.

## HOW LOUP SHIPMENTVISION SIMPLIFIES APIs

### Loup APIs:

- Allow real-time access to data between applications and devices
- Provide opportunities to streamline and automate workflows
- Eliminate multiple web browser and application uses
